Introduction

Thank you for purchasing a V680-series RFID System. This manual describes the functions, performance, and application methods needed for optimum use of the V680-series RFID System.

Please observe the following items when using the RFID System.

- Allow the RFID System to be installed and operated only by qualified specialist with a sufficient knowledge of electrical systems.
- Read and understand this manual before attempting to use the RFID System and use the RFID System correctly.
- Keep this manual in a safe and accessible location so that it is available for reference when required.

READ AND UNDERSTAND THIS DOCUMENT

Please read and understand this document before using the products. Please consult your OMRON representative if you have any questions or comments.

WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

SUITABILITY FOR USE

THE PRODUCTS CONTAINED IN THIS DOCUMENT ARE NOT SAFETY RATED. THEY ARE NOT DESIGNED OR RATED FOR ENSURING SAFETY OF PERSONS, AND SHOULD NOT BE RELIED UPON AS A SAFETY COMPONENT OR PROTECTIVE DEVICE FOR SUCH PURPOSES. Please refer to separate catalogs for OMRON's safety rated products.

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the product.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this document.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

PERFORMANCE DATA

Performance data given in this document is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the product may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products.

DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

ERRORS AND OMISSIONS

The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.

PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

COPYRIGHT AND COPY PERMISSION

This document shall not be copied for sales or promotions without permission. This document is protected by copyright and is intended solely for use in conjunction with the product. Please notify us before copying or reproducing this document in any manner, for any other purpose. If copying or transmitting this document to another, please copy or transmit it in its entirety.

Safety Precautions

Alert Symbols for Safe Use

The following symbols are used in this manual to indicate precautions that must be observed to ensure safe use of the V680-HS63, V680-HS52, V680-HS65, V680-HA63B, V680-D2KF67, V680-D2KF67M, V680-D2KF52M, V680-D8KF68, and V680-D32KF68. The precautions provided here contain important safety information. Be sure to observe these precautions.

The following signal words are used in this manual.

Indicates a potentially hazardous situation which, if not avoided, will result in minor or moderate injury, or may result in serious injury or death. Additionally, there may be significant property damage.

Meanings of Alert Symbols

Indicates general prohibitions for which there is no specific symbol.

Warning

These Products are not designed to be used either directly or indirectly in applications that detect human presence for the purpose of maintaining safety. Do not use these Products as a sensing means for protecting human lives.

Regulations and Standards

The Products conform to the following overseas regulations and standards.

1. The United States

	Amplifier	Antenna
This product complies with Part 15 Subpart C of the FCC Rules. FCC ID: E4E6CYSIDV6800306	V680-HA63B	V680-HS52 V680-HS63 V680-HS65

FCC NOTICE

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

FCC WARNING

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Do not remove the ferrite core (TDK Type ZCAT1730-0730A) installed on the cables to suppress RF interference.

2. Europe

	Amplifier	Antenna
(Radio and Telecommunication Terminal Equipment Directive 1999/5/EC) Radio: EN 300 330-2V1.3.1 (04-2006) EN 300 330-1V1.5.1 (04-2006) EMC: EN 301 489-3V1.4.1 (08-2002) EN 301 489-1V1.6.1 (09-2005) Safety: EN 61010-1: 2001 (2nd Edition)	V680-HA63B	V680-HS52 V680-HS63 V680-HS65

English	Hereby, Omron, declares that the RFID System, V680-HS52 Series, V680-HS63 Series, V680-HS65 Series, and V680-HA63B Series are in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.
Finnish	Omron vakuuttaa täten että RFID Säännös, V680-HS52 Series, V680-HS63 Series, V680-HS65 Series, V680-HA63B Series tyyppinen laite on direktiivin 1999/5/EY oleellisten vaatimusten ja sitä koskevien direktiivin muiden ehtojen mukainen.
Dutch	Hierbij verklaart Omron dat het toestel de RFID Systeem, V680-HS52 'Serie, V680-HS63 'Serie, V680-HS65 'Serie, V680-HA63B 'Serie in overeenstemming is met de essentiële eisen en de andere relevante bepalingen van richtlijn 1999/5/EG.
French	Par la présente Omron déclare que la RFID Système, V680-HS52 Série, V680-HS63 Série, V680-HS65 Série, V680-HA63B Série sont conforme aux exigences essentielles et aux autres dispositions pertinentes de la directive 1999/5/CE.
Swedish	Härmed intygar Omron att den RFID System, V680-HS52 Serie, V680-HS63 Serie, V680-HS65 Serie V680-HA63B Serie står i överensstämmelse med de väsentliga egenskapskrav och övriga relevanta bestämmelser som framgår av direktiv 1999/5/EG.
Danish	Undertegnede Omron erklærer herved, at følgende den RFID System, V680-HS52 Serie, V680-HS63 Serie, V680-HS65 Serie, 680-HA63B Serie overholder de væsentlige krav og øvrige relevante krav i direktiv 1999/5/EF.
German	Hiermit erkläre Omron, die RFID System, V680-HS52 Serie, V680-HS63 Serie, V680-HS65 Serie, V680-HA63B Serie in Übereinstimmung mit den grundlegenden Anforderungen und den anderen relevanten Vorschriften der Richtlinie 1999/5/EG befindet. (BMW)
Greek	ΜΕ ΤΗΝ ΠΑΡΟΥΣΑ Omron ΔΗΛΩΝΕΙ RFID ΟΥΟΓΗΜΑ, V680-HS52 ΟΕΙΡΑ, V680-HS63 ΟΕΙΡΑ, V680-HS65 ΟΕΙΡΑ V680-HA63B ΟΕΙΡΑ ΣΥΜΜΟΡΦΟΝΕΤΑΙ ΠΡΟΣ ΤΙΣ ΟΥΣΙΟΔΕΙΣ ΑΠΑΙΤΗΣΕΙΣ ΚΑΙ ΤΙΣ ΛΟΙΠΕΣ ΣΧΕΤΙΚΕΣ ΔΙΑΤΑΞΕΙΣ ΤΗΣ ΟΔΗΓΙΑΣ 1999/5/ΕΚ.
Italian	Con la presente Omron dichiara che la RFID Sistema, V680-HS52Serie, V680-HS63 Serie, V680-HS65 Serie, V680-HA63B Serie sono conforme ai requisiti essenziali ed alle altre disposizioni pertinenti stabilite dalla direttiva 1999/5/CE.

1. 本产品的使用方法等请参见产品说明书。本产品的技术参数如下:

- 使用频率为:13.553-13.567MHz
- 所发射的电场强度在距设备10米处不得超过42dB μ A/m(采用准峰值检波);
- 频率容限: $\leq 100 \times 10^{-6}$
- 杂散辐射等其他技术指标请参照2005/423号文件

2. 使用者不得擅自更改发射频率、加大发射功率(包括额外加装射频功率放大器), 不得擅自外接天线或改用其它发射天线;
3. 使用时应注意不得对各种合法的无线电通信业务产生有害干扰; 一旦发现有干扰现象时, 应立即停止使用, 并采取措施消除干扰后方可继续使用;
4. 本产品为微功率无线电设备, 能够承受各种无线电业务的干扰或工业、科学及医疗应用设备的辐射干扰;
5. 本产品不得在飞机和机场附近使用。

低功率電波輻射性電機管理辦法

第十二條

經型式認證合格之低功率射頻電機，非經許可，公司、商號或使用者均不得擅自變更頻率、加大功率或變更原設計之特性及功能。

第十四條

低功率射頻電機之使用不得影響飛航安全及干擾合法通信；經發現有干擾現象時，應立即停用，並改善至無干擾時方得繼續使用。

前項合法通信，指依電信法規定作業之無線電通信。

低功率射頻電機須忍受合法通信或工業、科學及醫療用電波輻射性電機設備之干擾。

Este equipo opera a título secundario, consecuentemente, debe aceptar interferencias perjudiciales incluyendo equipos de la misma clase y puede no causar interferencias a sistemas operando a título primario.

13. Thailand

The certification is unnecessary, so the product can be used.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Do not remove the ferrite core (TDK Type ZCAT1730-0730A) installed on the cables to suppress RF interference.

Precautions for Safe Use

Be sure to observe the following precautions to ensure safe use of the Products.

1. Do not use the Products in environments with flammable, explosive, or corrosive gasses.
2. Do not attempt to disassemble, repair, or modify any Product.
3. Tighten mounting screws securely.
4. Because a cable has a locking mechanism, make sure that it has been locked before using the cable.
5. Do not allow water or pieces of wire to enter from openings in the case. Doing so may cause fire or electric shock.
6. Turn OFF the Controller power supply before mounting or removing an Antenna or Amplifier.
7. If an error is detected in any Product, immediately stop operation and turn OFF the power supply. Consult with an OMRON representative.
8. Dispose of the Products as industrial waste.
9. Observe all warnings and precautions given in the body of this manual.
10. Do not touch the product immediately after usage at high temperatures. Doing so may occasionally result in burning.

Precautions for Correct Use

Always observe the following precautions to prevent operation failures, malfunctions, and adverse effects on performance and equipment.

1. Installation Environment

Do not use the Products in the following locations.

- Locations exposed to corrosive gases, dust, metallic powder, or salts
- Locations not within the specified operating temperature range
- Locations subject to rapid changes in temperature or condensation
- Locations not within the specified humidity range
- Locations subject to direct vibration or shock outside the specified ranges
- Locations subject to spray of water, oil, or chemicals

2. Installation

The Products communicate with Tags using the 13.56-MHz frequency band. Some motors, inverters, and switching power supplies generate noise that can affect communications with the Tags and cause errors. If such devices are located near the Tags, always test operation in advance to confirm whether the system will be affected.

- Observe the following precautions to minimize the effects of normal noise.
 - (1) Ground all metal objects in the vicinity of the Products to 100 Ω or less.
 - (2) Do not use the Products near high-voltage or high-current lines.
- Do not use non-waterproof Products in an environment where mist is present.
- Do not expose the Products to chemicals that adversely affect the Product materials.
- When mounting the Products, tighten the screws to the following torques.

V680-HS63: 1.2 N·m

V680-HS52: 40 N·m

V680-HS65: 1.2 N·m

- Transmission will not be possible if the front and back panels are mistakenly reversed and the Unit is mounted to a metallic surface.

V680-D2KF67M

- The transmission distance will be reduced when the Unit is not mounted to a metallic surface.

V680-D2KF67M

- If multiple Antennas are mounted near each other, communications performance may decrease due to mutual interference. Refer to *Installing Antennas on page 50* and check to make sure there is no mutual interference.
- Depending on the operating environment, the case surface may become fogged, but basic performance will not be affected.

3. Storage

Do not store the Products in the following locations.

- Locations exposed to corrosive gases, dust, metallic powder, or salts
- Locations not within the specified storage temperature range
- Locations subject to rapid changes in temperature or condensation
- Locations not within the specified storage humidity range
- Locations subject to direct vibration or shock outside the specified ranges
- Locations subject to spray of water, oil, or chemicals

4. Cleaning

- Do not clean the Products with paint thinner or the equivalent. Paint thinner or the equivalent will dissolve the resin materials and case coating.

5. Combination of the Amplifier

Use the V680-D2KF67, V680-D2KF67M, V680-D2KF52M, V680-D8KF68, and V680-D32KF68 ID Tags in combination with only the V680-HA63B Amplifier. Do not use these ID Tags together with the V680-HA63A Amplifier.

Product Overview

 Features	14
 Product Configuration	15

Features

The V680-series RFID System actively supports many different types of system, such as distributed-control systems and many-product, small-lot production systems, with non-contact data communications using electromagnetic induction.

■ Non-contact Data Communications

The V680 Series uses electromagnetic induction to enable non-contact, bi-directional data communications between Antennas and Tags.

■ FRAM Memory

FRAM (non-volatile memory) is used for Tag memory. No battery is required, so there is no need to be concerned about battery service life.

■ CRC Used for Transmission Error Detection

A bi-directional 16-bit CRC (Cyclic Redundancy Check) has been added as the error detection method for wire transmissions between ID Controllers and Antennas, and for wireless transmissions between Antennas and Tags. This method maintains superior communications reliability even where problems such as noise occur.

■ Memory Capacity of 2,000, 8K, or 32K Bytes

Tags have a memory capacity of 2,000, 8K, or 32K bytes. In addition to the ID data required on-site, data such as model numbers and inspection information can be input.

■ Long service life: 10 billion accesses

The FRAM memory can be accessed up to 10 billion times (in units of single, 8-byte blocks)

■ Superior Environmental Resistance and High Reliability

Antennas and Tags now have greater environmental resistance and are not affected by vibration, oil, or water.

Product Configuration

A V680-series RFID System consists of an ID Controller, one or more Amplifiers, one or two Antennas, and Tags. Select the models suitable for the application.

When embedding the V680-D2KF52M into a metal surface, use the V680-HS52 Antenna. Transmission will not be possible if the V680-HS63 Antenna is used.

Use the V680-D2KF67, V680-D2KF67M, V680-D2KF52M, V680-D8KF68, and V680-D32KF68 ID Tags in combination with only the V680-HA63B Amplifier. Do not use these ID Tags together with the V680-HA63A Amplifier.

V680-HS63

General Specifications

Item	Model	V680-HS63-W (Standard cable, waterproof connector)	V680-HS63-R (Flexible cable, non-waterproof connector)
Ambient operating temperature		-10 to 60°C (with no icing)	
Ambient storage temperature		-25 to 75°C (with no icing)	
Ambient operating humidity		35% to 95% (with no condensation)	
Insulation resistance		20 MΩ min. (at 500 VDC) between cable terminals and case	
Dielectric strength		1,000 VAC, 50/60Hz for 1 min between cable terminals and case	
Degree of protection		IP67 (IEC60529) In-house standard for antenna oil resistance (former JEM standard equivalent to IP67g) Note: The connector specifications are IP67 and IP65 (IEC 60529).	IP67 (IEC60529) In-house standard for antenna oil resistance (former JEM standard equivalent to IP67g) Note: The connectors are not waterproof.
Vibration resistance		10 to 500 Hz, 1.5-mm double amplitude, acceleration: 100 m/s ² , 10 sweeps in each of 3 axis directions (up/down, left/right, and forward/backward) for 11 minutes each	
Shock resistance		500 m/s ² , 3 times each in 6 directions (Total: 18 times)	
Dimensions		40 × 53 × 23 mm	
Material		ABS resin case, epoxy resin filler	
Weight		Approx. 850 g (with 12.5 m cable)	
Cable length		Standard lengths of 2 and 12.5 m	

Dimensions

Dielectric strength		1,000 VAC, 50/60 Hz for 1 min between connector terminals and case	
Degree of protection		IP67 (IEC60529) In-house standard for antenna oil resistance (former JEM standard equivalent to IP67g) Note: The connector specifications are IP67 and IP65 (IEC 60529).	IP67 (IEC60529) In-house standard for antenna oil resistance (former JEM standard equivalent to IP67g) Note: The connectors are not waterproof.
Dielectric strength		10 to 500 Hz, 1.5-mm double amplitude, acceleration: 100 m/s ² , 10 sweeps in each of 3 axis directions (up/down, left/right, and forward/backward) for 11 minutes each	
Shock resistance		500 m/s ² , 3 times each in 6 directions (Total: 18 times)	
Dimensions		100 × 100 × 30 mm	
Material		ABS resin case, epoxy resin filler	
Weight		Approx. 1100 g (with 12.5 m cable)	
Cable length		Standard lengths of 2 and 12.5 m	

Dimensions

Amplifier

V680-HA63B

General Specifications

Item	Model	V680-HA63B
Ambient operating temperature		-10 to 55°C (with no icing)
Ambient storage temperature		-25 to 65°C (with no icing)
Ambient operating humidity		35% to 85% (with no condensation)
Insulation resistance		20 MΩ min. (at 500 VDC) between cable terminals and case
Dielectric strength		1,000 VAC, 50/60 Hz for 1 minute between cable terminals and case.
Degree of protection		IP67, IP65 (IEC 60529) Note: Not including connector at Controller end. (When V680-HS63-W or V680-HS52-W is connected)
		IP40 (IEC 60529) (When V680-HS63-R or V680-HS52-R is connected)
Dielectric strength		10 to 500 Hz, 1.5-mm double amplitude, acceleration:100 m/s ² , 10 sweeps in each of 3 axis directions (up/down, left/right, and forward/backward) for 11 minutes each
Shock resistance		500 m/s ² , 3 times each in 6 directions (Total: 18 times)
Dimensions		25 × 40 × 65 mm (Not including protrusions.)
Materials		PC
Weight		Approx. 650 g (with 10 m cable)
Cable length		Standard lengths of 5 and 10 m

Note: The maximum total cable extension is 50 m (including the Amplifier cable). A maximum of two extension cables can be connected.

Dimensions

Case material	PC resin
Cable	PVC

Nomenclature

■ Antenna Connection Port

The Antenna connection port is connected a V680-series Antenna.

■ Controller Connector

The Controller connector is connected to Antenna connection port on the Controller.

■ Operation Indicators (LEDs)

Name	Color	Meaning
RUN	Green	Lit when the power is ON.
COMM	Yellow	Lit when a command is being sent.
NORM	Green	Lit when communications with a Tag are normal in Normal Communications Mode.
ERR	Red	Lit when an error occurs in communications with a Tag in Normal Communications Mode.
LV6/7D	Yellow	Maintenance Mode: Lit at distance or speed level 6. Normal Communications Mode: Lit when a write protection error occurs.
LV5/7A	Yellow	Maintenance Mode: Lit at distance or speed level 5 or higher. Normal Communications Mode: Lit when an address error occurs.
LV4/76	Yellow	Maintenance Mode: Lit at distance or speed level 4 or higher. Normal Communications Mode: Lit when a Tag memory error occurs.
LV3/72	Yellow	Maintenance Mode: Lit at distance or speed level 3 or higher. Normal Communications Mode: Lit when a no Tag error occurs.
LV2/71	Yellow	Maintenance Mode: Lit at distance or speed level 2 or higher. Normal Communications Mode: Lit when a verification error occurs.
LV1/70	Yellow	Maintenance Mode: Lit at distance or speed level 1 or higher. Normal Communications Mode: Lit when a Tag communications error occurs.

The distance level will vary greatly depending on the surrounding environment. The setting position will serve as a guide, but use RUN mode to conduct a sufficient number of tests in the actual operating environment. Values of distance level 4 or above may not be displayed, but this will not affect the RUN mode performance and does not indicate a malfunction.

Specifications and Dimensions

■ V680-D2KF52M

• General Specifications

Item	Model	V680-D2KF52M
Memory capacity		2,000 bytes (user area)
Memory type		FRAM
Data backup time		10 years after writing (55°C or less)
Memory longevity		10 billion times per block. Access frequency (See note) : 10 billion times
Ambient operating temperature		–25 to 85°C (with no icing)
Ambient storage temperature		–40 to 85°C (with no icing)
Ambient operating humidity		35% to 85%
Degree of protection		IP67 (IEC 60529)
Vibration resistance		10 to 2,000 Hz, 1.5-mm double amplitude, acceleration: 150 m/s ² , 10 sweeps each in X, Y, and Z directions for 15 minutes each
Shock resistance		500 m/s ² , 3 times each in X, Y, and Z directions (Total: 18 times)
Dimensions		8 dia. × 5 mm
Materials		Case: PPS resin, Fill resin: Epoxy resin
Weight		Approx. 0.5 g
Metal countermeasures		Yes

Note: The total communication frequency of the Read or Write is called an access frequency.

• Dimensions

When embedding the V680-D2KF52M into a metal surface, use the V680-HS52 Antenna. Transmission will not be possible if the V680-HS63 Antenna is used.

The side with the markings is the communications surface. Mount the Tag with this side facing the Antenna.

■ V680-D2KF67/67M

Memory Map

■ V680-D2KF52/-D2KF67/-D2KF67M

FRAM is used as memory in the Tags.
The memory capacity available to the user is 2,000 bytes, including 0000H to 0003H (the Write Protection Setting Area).

■ V680-D8KF68

FRAM is used as memory in the Tags.
The memory capacity available to the user is 8,192 bytes, including 0000H to 0003H (the Write Protection Setting Area).

■ V680-D32KF68

FRAM is used as memory in the Tags.
The memory capacity available to the user is 32,744 bytes, including 0000H to 0003H (the Write Protection Setting Area).

The access to the memory is executed at every block
1 block is 8 bytes (8 addresses).

CHECK!

Write Protection Function

The write protection function prevents important data, such as product information, stored in memory in a Tag from being inadvertently overwritten.

After important data has been written to memory, it can be write-protected using the following method.

CHECK!

The write protect function setting can be switched with switches 4 to 7 (Write Protect Function Setting) of the V680-CA5D□□-V2 Controller.

Setting the Write Protection Function

Write protection is set in Tag addresses 0000H to 0003H.

The setting for the most significant bit of address 0000H specifies whether or not write protection is enabled.

Address	Bit	7	6	5	4	3	2	1	0
0000H	YES/ NO	Upper two digits of start address (00 to 7F)							
0001H		Lower two digits of start address (00to FF)							
0002H		Upper two digits of end address (00 to FF)							
0003H		Lower two digits of end address (00 to FF)							

Write-protect Bit (Most significant bit of address 0000H)

1: Write-protected (Yes)

0: Not write-protected (No)

Write Protection Setting Area

Start address: 0000H to 7FFFH

End address: 0000H to FFFFH

Write Protection Setting Examples

Settings to write-protect addresses 0008H through 03E7H:

Address	Bit	7	6	5	4	3	2	1	0
0000H		1	0	0	0	0	0	0	0
		8				0			
0001H		0	0	0	0	1	0	0	0
		0				8			
0002H		0	0	0	0	0	0	1	1
		0				3			
0003H		1	1	1	0	0	1	1	1
		E				7			

Settings to not write-protect any addresses:

Address	Bit	7	6	5	4	3	2	1	0
0000H		0	0	0	0	0	0	0	0
		0				0			
0001H		0	0	0	0	0	0	0	0
		0				0			
0002H		0	0	0	0	0	0	0	0
		0				0			
0003H		0	0	0	0	0	0	0	0
		0				0			

CHECK!

The write protect function is a function of the V680-CA5D□□-V2 Controller. This function is not supported by reader/writer units of other brands.

TAT and Communication Time (Reference)

TAT and Communications Time (Reference)

■ Communications Time

V680-HA63B, V680-HS□□, V680-D2KF□□

Communications speed setting	Command	Communications time N: No. of bytes processed
Normal mode	Read	$T = 1.2 N + 30$
	Write (with verification)	$T = 2.4 N + 49$
	Write (without verification)	$T = 1.2 N + 49$
High-speed mode (See note.)	Read	$T = 0.9 N + 27$
	Write (with verification)	$T = 1.7 N + 49$
	Write (without verification)	$T = 0.9 N + 41$

Note: When using multi-access or FIFO communications options, normal-mode communications speed will be used regardless of the high-speed mode setting.

Communications speed: Normal mode

Communications speed: high-speed mode

V680-HA63B, V680-HS□□, V680-D8KF□□, V680-D32KF□□

Communications speed setting	Command	Communications time N: No. of bytes processed
Normal mode	Read	$T = 1.3 N + 30$
	Write (with verification)	$T = 1.6 N + 59$
	Write (without verification)	$T = 1.3 N + 50$
High-speed mode (See note.)	Read	$T = 0.8 N + 25$
	Write (with verification)	$T = 1.1 N + 41$
	Write (without verification)	$T = 0.9 N + 40$

Note: When using multi-access or FIFO communications options, normal-mode communications speed will be used regardless of the high-speed mode setting.

Communications speed: Normal mode

Communications speed: high-speed mode

■ TAT (Turn Around Time)

“TAT” is the total time from the start of command transmission by the host device (e.g., a personal computer) until a response is received by the host device.

TAT = Command transmission time + Tag communications time + Response reception time

- Command transmission time: The time required to send a command from the host device to the ID Controller. The command transmission time varies depending on the baud rate and the communications format.
- Tag communications time: The processing time for communications between the Antenna and Tag.
- Response reception time: The time required to return a response from the ID Controller to the host device. The response reception time varies depending on the baud rate and the communications format.

• Normal Commands

• EXPANSION READ Command

• EXPANSION WRITE Command

	2,000	4,980	2,650	3,240	2,840
Read (See note 1.) Communications speed High-speed mode	100	246	175	140	117
	256	550	390	309	255
	512	1,049	741	588	485
	1,000	1,995	1,415	1,115	925
	2,000	3,955	1,625	2,215	1,815
Write (See note 1.) With verification Communications speed High-speed mode	100	292	221	186	163
	256	643	483	402	348
	512	1,219	911	758	655
	1,000	2,311	1,731	1,431	1,241
	2,000	4,571	2,241	2,831	2,431
Write (See note 1.) Without verification Communications speed High-speed mode	100	271	200	165	142
	256	591	431	350	296
	512	1,115	807	654	551
	1,000	2,110	1,530	1,230	1,040
	2,000	4,170	1,840	2,430	2,030

Note 1. When using multi-access or FIFO communications options, normal-mode communications speed will be used regardless of the high-speed mode setting.

2. TAT data is for a V680-CA5D01/02-V2 ID Controller with the following communications settings: 8-bit data length, 1 stop bit, and odd parity. Data was sent continuously without breaks between characters.

3. The number of bytes for TAT data is when the code designation is set to ASCII.

Calculating Tag Speed

When communicating with a moving Tag, specify an AUTO command or POLLING command. The maximum speed for communicating with the Tag can be calculated simply using the following formula.

$$\text{Maximum speed} = \frac{D \text{ (Distance travelled in communications area)}}{T \text{ (Communications time)}}$$

D (Distance travelled in communications area) is calculated from the actual measurement or the communications area between the Antenna and Tag.

Calculation Example

In this example diagram, the V680-D2KF67, V680-HA63B, and V680-HS63 are combined and 256 bytes are read.

This diagram shows the following:

Distance travelled in communications area (D) = 56 mm when Y (communications distance) = 20 mm
Communications time, T = 317 ms.

Accordingly, the movement speed in this case will be as follows:

$$\frac{\text{Distance travelled in communications area}}{\text{Communications time}} = \frac{56 \text{ (mm)}}{317 \text{ (ms)}} = 10.60 \text{ m/min}$$

- Note**
1. The distance travelled in the communications area depends on the read/write distance and the axis offset. Refer to the diagrams in *Communications Area*.
 2. The speed of the Tag is provided as a guideline. Before using the RFID System, run a test to determine the speed under actual operating conditions.
 3. The above values do not take into account the processing of errors in communications with the host device or Tags.

Section 4

Installation

 Installing Antennas	50
 Mounting Amplifiers	55
 Installing Tags	57

Installing Antennas

V680-HS63

■ Installation from the Front

■ Installation from the Back

Insert the nuts that come with the Antenna into sections A.

Securely tighten screws to a maximum torque of 1.2 N-m.

CHECK!

V680-HS52

Install the Antenna using the nuts and toothed washers that are provided on both sides of the mounting material, as shown in the diagram below.

CHECK!

When the Antenna is mounted to a metal object, the communications distance will be reduced by approximately 10% compared with mounting to a non-metallic object. For details on the effect of metal surrounding the Antenna, refer to *Effect of Surrounding Metals on the Antenna (Reference)* on page 52.

P.52

CHECK!

Securely tighten the screws to a maximum torque of 40 N-m.

V680-HS65

Use M4 screws and spring washers (in four places) for Antenna installation.

Tighten the screws to a torque of 0.7 to 1.2 N·m.

There are no restrictions on the mounting direction or the direction of access to the Tag, but if the Antenna is to be installed near a device such as a conveyance belt, make sure there is no danger of the Antenna being accidentally struck.

Securely tighten screws to a torque of 0.7 to 1.2 N·m.

■ Mounting Bracket Dimensions (Provided Only with the V680-HS65)

Note: When installing the Antenna, mount it on the enclosed Mounting Bracket. The Mounting Bracket is not necessary, however, if the Antenna is mounted on a metal base that is larger than the Antenna (100 × 100 mm).

Effect of Surrounding Metals on the Antenna (Reference)

■ V680-HS63

In addition to surface mounting, it is also possible to embed the V680-HS63 in a metal casing to protect it from being struck by other objects. To prevent malfunctioning, allow a space of at least 30 mm between the Antenna and the sides of the metal casing. If the space is less than 30 mm, the read/write distance will be greatly diminished. In addition, the height of metal casing must not exceed that of the Antenna.

- Note**
1. Do not bend the cable into a curve tighter than 22 mm in radius.
 2. The communications distance will be reduced significantly if the Antenna is installed closer than 30 mm to metal surfaces.

■ V680-HS52

When embedding the Antenna in metal, be sure the metal does not extend beyond the tip of the Antenna.

Do not bend the cable into a curve tighter than 22 mm in radius.

If the metal around the Antenna reaches the coil surface, the communications distance will be reduced significantly compared with mounting to a non-metallic surface.

■ V680-HS65

In addition to surface mounting, it is also possible to embed the V680-HS65 in a metal casing to protect it from being struck by other objects. To prevent malfunctioning, allow a space of at least 100 mm between the Antenna and the sides of the metal casing. If the space is less than 100 mm, the read/write distance will be greatly diminished. In addition, the height of metal casing must not exceed that of the Antenna.

- Note**
1. Do not bend the cable into a curve tighter than 22 mm in radius.
 2. The communications distance will be reduced significantly if the Antenna is installed closer than 100 mm to metal surfaces.

Mutual Interference between Antennas (Reference)

To prevent malfunctioning due to mutual interference when using more than one Antenna, leave sufficient space between them as shown in the following diagrams.

■ V680-HS63

• Installing the Antennas Facing Each Other

• Installing the Antennas in Parallel

■ V680-HS52

• Installing the Antennas Facing Each Other

• Installing the Antennas in Parallel

■ V680-HS65

• Installing the Antennas Facing Each Other

• Installing the Antennas in Parallel

Mounting Amplifiers

V680-HA63B

■ Mounting to DIN Track

Note 1. Consider the height of the DIN Track.

2. Provide a space of at least 10 mm (i.e., at least two spacers) and attach them securely.

Amplifier Cable Bending Radius

Do not bend the cable past a bending radius of 35 mm.

Attaching/Removing V680-HA63B/-HS63/-HS52/-HS65 Connectors

■ Attaching the Connector

1. Hold the Antenna connector, align the key, and insert the connector into the Amplifier connector.
2. Turn the connector clockwise to lock it in place.

■ Removing the Connector

1. Turn the connector counterclockwise to release the lock.
2. Pull the Antenna connector straight out.

The connector will not come out unless the lock is first released by turning the connector. To remove the cable, release the lock and pull on the connector. Pulling the cable without releasing the lock may break or damage the cable.

Installing Tags

V680-D2KF52M

Tag Installation Direction

Mount Tags as shown in the diagram on the right.

The epoxy adhesives listed in the following table are recommended for the given temperature ranges.

Ambient operating temperature	Product name	Manufacturer
-40 to 70°C	Two-part Epoxy-compound Resin: TB2001 (main agent)/ TB2105C (curing agent)	Three Bond Co., Ltd.
	One-part Moisture-curing Elastic Adhesive TB1530	Three Bond Co., Ltd.
-40 to 85°C	One-part Epoxy Resin: TB2285	Three Bond Co., Ltd.
	Two-part Epoxy Resin: TB2087	Three Bond Co., Ltd.

CHECK!

When embedding the V680-D2KF52M into a metal surface, use the V680-HS52 Antenna. Transmission will not be possible if the V680-HS63 Antenna is used.

Differences in Surrounding Metals

Communications distances are affected by the type of metal in back of or surrounding the Tag, as shown in the following table.

	Steel	SUS	Brass	Aluminum
V680-D2KF52M	100%	80% to 85%	80% to 85%	75% to 80%

The values for steel are set to 100%

Mutual Interference with Tags (Reference)

Provide the mounting distances indicated below to prevent malfunctions due to mutual interference when using more than one Tag.

■ Influence of Angle (Reference)

Install Antennas and Tags as close to parallel to each other as possible. Communications are possible even when an Antenna and a Tag are mounted at an angle, but the communications distance will be shortened. The relation between the angle and the communications distance is shown below.

■ Percentage Drop in Communications Distance According to Angle of V680-D2KF52M

● V680-HS52 and V680-D2KF52M

● V680-HS63 and V680-D2KF52M

● V680-HS52 and V680-D2KF52M (Metal: Steel)

• V680-HS52 and V680-D2KF52M

• V680-HS63 and V680-D2KF52M

• V680-HS52 and V680-D2KF52M (Metal: Steel)

V680-D2KF67

■ Tag Installation Direction

Secure the Tag with M3 screws. Tighten the screws to a torque of 0.6 N·m or less.

■ Effect of Metal behind Tags (Reference)

The V680-D2KF67 communications distance is reduced if there is any metal material behind the Tag.

■ Mutual Interference with Tags (Reference)

To prevent malfunctioning due to mutual interference when using more than one Tag, leave sufficient space between them as shown in the following diagram.

• When V680-HS63, V680-HS52, and V680-HS65 are Used

■ Influence of Tag Angle (Reference)

Install Antennas and Tags as close to parallel to each other as possible. Communications are possible even when an Antenna and a Tag are mounted at an angle, but the communications distance will be shortened. The relation between the angle and the communications distance is shown below.

• V680-HS52 and V680-D2KF67

• V680-HS63 and V680-D2KF67

• V680-HS65 and V680-D2KF67

V680-D2KF67M

■ Tag Installation Direction

Mount the V680-D2KF67M to a metal surface, and secure the Tag with M3 screws. Tighten the screws to a torque of 0.6 N·m or less.

■ Effect of Surrounding Metals

The V680-D2KF67M can be surface-mounted or it can be embedded in metal. If it is embedded in metal, the height of the metal casing must not exceed that of the Tag.

● V680-HS52 and V680-D2KF67M

● V680-HS63 and V680-D2KF67M

● V680-HS65 and V680-D2KF67M

■ Mutual Interference with Tag (Reference)

To prevent malfunctioning due to mutual interference when using more than one Tag, leave sufficient space between them as shown in the following diagram.

• When V680-HS63, V680-HS52, and V680-HS65 are Used

■ Influence of Tag Angle (Reference)

Install Antennas and Tags as close to parallel to each other as possible. Communications are possible even when an Antenna and a Tag are mounted at an angle, but the communications distance will be shortened. The relation between the angle and the communications distance is shown below.

• V680-HS52 and V680-D2KF67M

• V680-HS63 and V680-D2KF67M

• V680-HS65 and V680-D2KF67M

V680-D8KF68/-D32KF68

■ Tag Installation Direction

Secure the Tag with M4 screws. Tighten the screws to a torque of 0.7 to 1.2 N·m.

■ Effect of Metal behind Tags (Reference)

Special Attachment (V680-A81) Installation Direction

The transmission distance will be reduced if there is metal in back of a Tag. When mounting on a metal surface, use the special Attachment (V680-A81) of another sales or insert a non-metallic spacer (e.g., plastic, wood, etc.).

The following diagrams show the relationship between the distance between a Tag and metal surface and the transmission distance. The Attachment is 10 mm thick.

● V680-HS63 & V680-D8KF68/-D32KF68

● V680-HS65 & V680-D8KF68/-D32KF68

■ Mutual Interference with Tag (Reference)

To prevent malfunctioning due to mutual interference when using more than one Tag, leave sufficient space between them as shown in the following diagram.

• When V680-HS63, V680-HS52 are Used

• When V680-HS65 is Used

■ Influence of Tag Angle (Reference)

Install Antennas and Tags as close to parallel to each other as possible. Communications are possible even when an Antenna and a Tag are mounted at an angle, but the communications distance will be shortened. The relation between the angle and the communications distance is shown below.

- V680-HS63 and V680-D8KF68 or V680-D32KF68 (Horizontal-facing ID Tag)

- V680-HS63 and V680-D8KF68, V680-D32KF68 (Vertical-facing ID Tag)

- V680-HS63 and V680-D8KF68 or V680-D32KF68 (Horizontal-facing ID Tag)

- V680-HS63 and V680-D8KF68, V680-D32KF68 (Vertical-facing ID Tag)

- V680-HS65 and V680-D8KF68 or V680-D32KF68 (Horizontal-facing ID Tag)

- V680-HS65 and V680-D8KF68, V680-D32KF68 (Vertical-facing ID Tag)

- V680-HS65 and V680-D8KF68 or V680-D32KF68 (Horizontal-facing ID Tag)

- V680-HS65 and V680-D8KF68, V680-D32KF68 (Vertical-facing ID Tag)

 Degree of Protection	72

Chemical Resistance of the Antennas

Applicable Models

V680-HS63-W/R V680-HS52-W/R V680-HS65-W/R

ABS resin is used for case material and epoxy resin for filling material. Refer to the following lists and do not use chemicals that affect ABS and epoxy resin.

Chemicals That Cause Deformations, Cracks, Etc.

ABS resin	Epoxy resin
Trichlene, acetone, xylene, toluene, gasoline, creosol, methylene chloride, phenol, cyclohexane, aqua regia, chromic acid, sulfuric acid (90% RT), methyl ethyl ketone, aniline, nitrobenzene, monochlorobenzene, pyridine, nitric acid (60% RT), formic acid (80% RT)	Aqua regia, chromic acid, sulfuric acid (90% RT), nitric acid (60% RT), ammonia solution, acetone, methylene chloride, phenol

Chemicals That May Cause Discoloration, Swelling, Etc.

ABS resin	Epoxy resin
Hydrochloric acid, alcohol, Freon, sodium hydroxide, hydrogen peroxide, benzene, sulfuric acid (10% RT), nitric acid (10% RT), phosphoric acid (85% RT), ammonia solution	Sulfuric acid (10% RT), nitric acid (10% RT), hydrochloric acid (30% RT), acetic acid (50% RT), oxalic acid, calcium hydroxide, benzene, creosol, alcohol, cyclohexane, toluene, xylene, benzene, grease

Chemicals That Do Not Affect ABS Resin or Epoxy Resin

ABS resin	Epoxy resin
Ammonia, kerosene, mineral oil, developer, Yushiroken S50, Chemi-Cool Z, Velocity No. 3, Yushiroken EEE-30Y, petroleum, grease, acetic acid, oxalic acid, calcium hydroxide, phosphoric acid (30% RT), hydrochloric acid (10% RT), potassium hydroxide	Ammonia, hydrochloric acid (10% RT), potassium hydroxide, petroleum, gasoline, Yushiroken S50, Chemi-Cool Z, Velocity No. 3, Yushiroken EEE-30Y

Note: The above results are from tests conducted at room temperature (23°C). Even if the chemicals do not affect the ABS or epoxy resins at room temperature, they may affect the resins at higher or lower temperatures. Check the chemicals carefully in advance.

Chemical Resistance of Tags

Applicable Models

V680-D2KF67/67M

Chemicals that affect Tags are shown below.

ABS resin is used for case material and epoxy resin for filling material. Refer to the following lists and do not use chemicals that affect ABS and epoxy resin.

Tags cannot be used in applications with explosion-proof specifications.

Chemicals That Cause Deformations, Cracks, Etc.

ABS resin	Epoxy resin
Trichlene, acetone, xylene, toluene, gasoline, creosol, methylene chloride, phenol, cyclohexane, aqua regia, chromic acid, sulfuric acid (90% RT), methyl ethyl ketone, aniline, nitrobenzene, monochlorobenzene, pyridine, nitric acid (60% RT), formic acid (80% RT)	Aqua regia, chromic acid, sulfuric acid (90% RT), nitric acid (60% RT), ammonia solution, acetone, methylene chloride, phenol

Chemicals That May Cause Discoloration, Swelling, Etc.

ABS resin	Epoxy resin
Hydrochloric acid, alcohol, Freon, sodium hydroxide, hydrogen peroxide, benzene, sulfuric acid (10% RT), nitric acid (10% RT), phosphoric acid (85% RT), ammonia solution	Sulfuric acid (10% RT), nitric acid (10% RT), hydrochloric acid (30% RT), acetic acid (50% RT), oxalic acid, calcium hydroxide, benzene, creosol, alcohol, cyclohexane, toluene, xylene, benzene, grease

Chemicals That Do Not Affect ABS Resin or Epoxy Resin

ABS resin	Epoxy resin
Ammonia, kerosene, mineral oil, developer, Yushiroken S50, Chemi-Cool Z, Velocity No. 3, Yushiroken EEE-30Y, petroleum, grease, acetic acid, oxalic acid, calcium hydroxide, phosphoric acid (30% RT), hydrochloric acid (10% RT), potassium hydroxide	Ammonia, hydrochloric acid (10% RT), potassium hydroxide, petroleum, gasoline, Yushiroken S50, Chemi-Cool Z, Velocity No. 3, Yushiroken EEE-30Y

Note: The above results are from tests conducted at room temperature (23°C). Even if the chemicals do not affect the ABS or epoxy resins at room temperature, they may affect the resins at higher or lower temperatures. Check the chemicals carefully in advance.

Applicable Model

V680-D2KF52M

PPS resin is used for case material and epoxy resin for filling material. Refer to the following lists and do not use chemicals that affect PPS and epoxy resin.

Tags cannot be used in applications with explosion-proof specifications.

Chemicals That Cause Deformations, Cracks, Etc.

PPS resin	Epoxy resin
Aqua regia	Aqua regia, chromic acid, sulfuric acid (90% RT), nitric acid (60% RT), ammonia solution, acetone, methylene chloride, phenol

Chemicals That May Cause Discoloration, Swelling, Etc.

PPS resin	Epoxy resin
Nitric acid (60% RT)	Sulfuric acid (10% RT), nitric acid (10% RT), hydrochloric acid (30% RT), acetic acid (50% RT), oxalic acid, calcium hydroxide, benzene, creosol, alcohol, cyclohexane, toluene, xylene, benzene, grease

Chemicals that Do Not Affect PPS Resin or Epoxy Resin

PPS resin	Epoxy resin
Hydrochloric acid (37%RT), sulfuric acid (98%RT), nitric acid (40%RT), Hydrogen fluoride solution (40%RT), chromic acid (40%RT), hydrogen peroxide (28%RT), sodium hydroxide solution (60%RT), ammonia solution (28%RT), sodium chloride (10%RT), sodium carbonate (20%RT), sodium hypochlorite, phenol solution (5%RT), glacial acetic acid, acetic acid, oleic acid, Methyl alcohol (95%RT), ethyl alcohol (95%RT), Ethyl acetate, sebacic acid, diethylhexyl, acetone, diethyl ether, n-heptane, 2-2-4 trimethylpentane, benzene, toluene, aniline, mineral oil, gasoline, insulating oil, dichloroethylene, carbon tetrachloride	Ammonia, hydrochloric acid (10% RT), potassium hydroxide, petroleum, gasoline, Yushiroken S50, Chemi-Cool Z, Velocity No. 3, Yushiroken EEE-30Y, methyl ethyl ketone, sodium hydroxide (10%RT)

Note: The above results are from tests conducted at room temperature (23°C). Even if the chemicals do not affect the PPS or epoxy resins at room temperature, they may affect the resins at higher or lower temperatures. Check the chemicals carefully in advance.

Applicable Model

V680-D8KF68/D32KF68

Chemicals that affect Tags are shown below.

Polybutylene terephthalate (PBT) resin is used for case material and epoxy resin for filling material. Refer to the following lists and do not use chemicals that affect PBT and epoxy resins.

Tags cannot be used in applications with explosion-proof specifications.

Chemicals That Cause Deformations, Cracks, Etc.

PBT resin	Epoxy resin
Acetone, trichloroethylene, ethylene dichloride, sodium hydroxide, and other alkaline substances	Aqua regia, chromic acid, sulfuric acid (90% RT), nitric acid (60% RT), liquid ammonia, acetone, methylene chloride, phenol

Chemicals That May Cause Discoloration, Swelling, Etc.

PBT resin	Epoxy resin
Hydrochloric acid (10% RT), acetic acid (5% RT), benzene	Sulfuric acid (10% RT), nitric acid (10% RT), concentrated hydrochloric acid, acetic acid (50% RT), nitric acid, calcium hydroxide, benzene, cresol, alcohol, microhexanon, toluene, xylene, benzene, grease

Chemicals that Do Not Affect PPS Resin or Epoxy Resin

PBT resin	Epoxy resin
Nitric acid (30% RT), concentrated hydrochloric acid, acetic acid, ethyl acetate (100% RT), potassium permanganate (5% RH), ethyl acetate, carbon tetrachloride, methanol, ethanol, gasoline	Ammonia, hydrochloric acid (10% RT), calcium hydroxide, petroleum, gasoline, Yushiroken S50, Chemi-cool Z, Velocity No. 3, Yushiroken EEE-30Y, methyl ethyl ketone, sodium hydroxide

Note: The above results are from tests conducted at room temperature (23°C). Even if the chemicals do not affect the PPS or epoxy resins at room temperature, they may affect the resins at higher or lower temperatures. Check the chemicals carefully in advance.

Degree of Protection

Ingress protection degrees (IP-□□) are determined by the following tests. Be sure to check the sealing capability under the actual operating environment and conditions before actual use.

IP indicates the ingress protection symbol.

■ IEC (International Electrotechnical Commission) Standards IEC 60529: 1989-11

(A) First Digit: Degree of Protection from Solid Materials

Degree	Degree	
0		No protection
1		Protects against penetration of any solid object such as a hand that is 50 mm or more in diameter.
2		Protects against penetration of any solid object, such as a finger, that is 12.5 mm or more in diameter.
3		Protects against penetration of any solid object, such as a wire, that is 2.5 mm or more in diameter.
4		Protects against penetration of any solid object, such as a wire, that is 1 mm or more in diameter.
5		Protects against penetration of dust of a quantity that may cause malfunction or obstruct the safe operation of the product.
6		Protects against penetration of all dust.

(B) Second Digit: Degree of Protection Against Water

Degree	Protection		Test method (with pure water)
0	No protection	Not protected against water.	No test
1	Protection against water drops 	Protects against vertical drops of water towards the product.	Water is dropped vertically towards the product from the test machine for 10 min.
2	Protection against water drop 	Protects against drops of water approaching at a maximum angle of 15° to the left, right, back, and front from vertical towards the product.	Water is dropped for 2.5 min each (i.e., 10 min in total) towards the product inclined 15° to the left, right, back, and front from the test machine.

Degree	Protection	Test method (with pure water)
3	Protection against sprinkled water 	Protects against sprinkled water approaching at a maximum angle of 60° from vertical towards the product. Water is sprinkled for 10 min at a maximum angle of 60° to the left and right from vertical from the test machine.  Water rate is 0.07 liter/min per hole.
4	Protection against water spray 	Protects against water spray approaching at any angle towards the product. Water is sprayed at any angle towards the product for 10 min from the test machine.  Water rate is 0.07 liter/min per hole.
5	Protection against water jet spray 	Protects against water jet spray approaching at any angle towards the product. Water is jet sprayed at any angle towards the product for 1 min per square meter for at least 3 min in total from the test machine.  12.5 liter/min Discharging nozzle: 6.3 dia.
6	Protection against high pressure water jet spray 	Protects against high-pressure water jet spray approaching at any angle towards the product. Water is jet sprayed at any angle towards the product for 1 min per square meter for at least 3 min in total from the test machine.  2.5 to 3 m 100 liter/min Discharging nozzle: 6.3 dia.
7	Protection underwater 	Resists the penetration of water when the product is placed underwater at specified pressure for a specified time. The product is placed 1 m deep in water (if the product is 850 mm max. in height) for 30 min. 
8	Protection underwater 	Can be used continuously underwater. The test method is determined by the manufacturer and user.

Oil resistance (OMRON in-house standard)

Protection	
Oil-resistant	No adverse affect from oil drops or oil spray approaching from any direction.
Oil-proof	Protects against penetration of oil drops or oil spray approaching from any direction.

Note: This OMRON in-house standard confirms resistance to cutting and other oils. It is equivalent to the former JEM standard.

Revision History

A manual revision code appears as a suffix to the catalog number at the bottom of the front and rear pages.

Cat. No.: Z248-E1-03A

Revision code

Revision code	Date	Revised contents
01	October 2006	Original production
02	May 2007	Added items for V680-D8KF68/-D32KF68 ID Tags.
03	July 2007	Added items for V680-A81, V680-HS65 Antenna, and the overseas regulations and standards.
03A	September 2007	Added information on metal on back surface of the V680-HS65, corrected Tag specifications, and made other minor corrections.

Terms and Conditions of Sale

1. **Offer; Acceptance.** These terms and conditions (these "Terms") are deemed part of all quotes, agreements, purchase orders, acknowledgments, price lists, catalogs, manuals, brochures and other documents, whether electronic or in writing, relating to the sale of products or services (collectively, the "Products") by Omron Electronics LLC and its subsidiary companies ("Omron"). Omron objects to any terms or conditions proposed in Buyer's purchase order or other documents which are inconsistent with, or in addition to, these Terms.
2. **Prices; Payment Terms.** All prices stated are current, subject to change without notice by Omron. Omron reserves the right to increase or decrease prices on any unshipped portions of outstanding orders. Payments for Products are due net 30 days unless otherwise stated in the invoice.
3. **Discounts.** Cash discounts, if any, will apply only on the net amount of invoices sent to Buyer after deducting transportation charges, taxes and duties, and will be allowed only if (i) the invoice is paid according to Omron's payment terms and (ii) Buyer has no past due amounts.
4. **Interest.** Omron, at its option, may charge Buyer 1-1/2% interest per month or the maximum legal rate, whichever is less, on any balance not paid within the stated terms.
5. **Orders.** Omron will accept no order less than \$200 net billing.
6. **Governmental Approvals.** Buyer shall be responsible for, and shall bear all costs involved in, obtaining any government approvals required for the importation or sale of the Products.
7. **Taxes.** All taxes, duties and other governmental charges (other than general real property and income taxes), including any interest or penalties thereon, imposed directly or indirectly on Omron or required to be collected directly or indirectly by Omron for the manufacture, production, sale, delivery, importation, consumption or use of the Products sold hereunder (including customs duties and sales, excise, use, turnover and license taxes) shall be charged to and remitted by Buyer to Omron.
8. **Financial.** If the financial position of Buyer at any time becomes unsatisfactory to Omron, Omron reserves the right to stop shipments or require satisfactory security or payment in advance. If Buyer fails to make payment or otherwise comply with these Terms or any related agreement, Omron may (without liability and in addition to other remedies) cancel any unshipped portion of Products sold hereunder and stop any Products in transit until Buyer pays all amounts, including amounts payable hereunder, whether or not then due, which are owing to it by Buyer. Buyer shall in any event remain liable for all unpaid accounts.
9. **Cancellation; Etc.** Orders are not subject to rescheduling or cancellation unless Buyer indemnifies Omron against all related costs or expenses.
10. **Force Majeure.** Omron shall not be liable for any delay or failure in delivery resulting from causes beyond its control, including earthquakes, fires, floods, strikes or other labor disputes, shortage of labor or materials, accidents to machinery, acts of sabotage, riots, delay in or lack of transportation or the requirements of any government authority.
11. **Shipping; Delivery.** Unless otherwise expressly agreed in writing by Omron:
 - a. Shipments shall be by a carrier selected by Omron; Omron will not drop ship except in "break down" situations.
 - b. Such carrier shall act as the agent of Buyer and delivery to such carrier shall constitute delivery to Buyer;
 - c. All sales and shipments of Products shall be FOB shipping point (unless otherwise stated in writing by Omron), at which point title and risk of loss shall pass from Omron to Buyer; provided that Omron shall retain a security interest in the Products until the full purchase price is paid;
 - d. Delivery and shipping dates are estimates only; and
 - e. Omron will package Products as it deems proper for protection against normal handling and extra charges apply to special conditions.
12. **Claims.** Any claim by Buyer against Omron for shortage or damage to the Products occurring before delivery to the carrier must be presented in writing to Omron within 30 days of receipt of shipment and include the original transportation bill signed by the carrier noting that the carrier received the Products from Omron in the condition claimed.
13. **Warranties.** (a) **Exclusive Warranty.** Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied. (b) **Limitations.** OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) **Buyer Remedy.** Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty. See <http://www.omron247.com> or contact your Omron representative for published information.
14. **Limitation on Liability; Etc.** OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY. Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.
15. **Indemnities.** Buyer shall indemnify and hold harmless Omron Companies and their employees from and against all liabilities, losses, claims, costs and expenses (including attorney's fees and expenses) related to any claim, investigation, litigation or proceeding (whether or not Omron is a party) which arises or is alleged to arise from Buyer's acts or omissions under these Terms or in any way with respect to the Products. Without limiting the foregoing, Buyer (at its own expense) shall indemnify and hold harmless Omron and defend or settle any action brought against such Companies to the extent based on a claim that any Product made to Buyer specifications infringed intellectual property rights of another party.
16. **Property; Confidentiality.** Any intellectual property in the Products is the exclusive property of Omron Companies and Buyer shall not attempt to duplicate it in any way without the written permission of Omron. Notwithstanding any charges to Buyer for engineering or tooling, all engineering and tooling shall remain the exclusive property of Omron. All information and materials supplied by Omron to Buyer relating to the Products are confidential and proprietary, and Buyer shall limit distribution thereof to its trusted employees and strictly prevent disclosure to any third party.
17. **Export Controls.** Buyer shall comply with all applicable laws, regulations and licenses regarding (i) export of products or information; (ii) sale of products to "forbidden" or other proscribed persons; and (iii) disclosure to non-citizens of regulated technology or information.
18. **Miscellaneous.** (a) **Waiver.** No failure or delay by Omron in exercising any right and no course of dealing between Buyer and Omron shall operate as a waiver of rights by Omron. (b) **Assignment.** Buyer may not assign its rights hereunder without Omron's written consent. (c) **Law.** These Terms are governed by the law of the jurisdiction of the home office of the Omron company from which Buyer is purchasing the Products (without regard to conflict of law principles). (d) **Amendment.** These Terms constitute the entire agreement between Buyer and Omron relating to the Products, and no provision may be changed or waived unless in writing signed by the parties. (e) **Severability.** If any provision hereof is rendered ineffective or invalid, such provision shall not invalidate any other provision. (f) **Setoff.** Buyer shall have no right to set off any amounts against the amount owing in respect of this invoice. (g) **Definitions.** As used herein, "including" means "including without limitation"; and "Omron Companies" (or similar words) mean Omron Corporation and any direct or indirect subsidiary or affiliate thereof.

Certain Precautions on Specifications and Use

1. **Suitability of Use.** Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases but the following is a non-exhaustive list of applications for which particular attention must be given:
 - (i) Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this document.
 - (ii) Use in consumer products or any use in significant quantities.
 - (iii) Energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
 - (iv) Systems, machines and equipment that could present a risk to life or property. Please know and observe all prohibitions of use applicable to this Product.
 NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON'S PRODUCT IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.
2. **Programmable Products.** Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.
3. **Performance Data.** Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.
4. **Change in Specifications.** Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.
5. **Errors and Omissions.** Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
